SUMMARY

Full-stack software engineer with 4 years of experience building and shipping end-to-end web products, from modern React/Vue SPAs to Node.js and NestJS backends with their data pipelines. Experienced across third-party API integrations and analytics-grade data platforms, working directly with clients and cross-cultural teams.

EXPERIENCE

KeyReply — Software Engineer

Singapore (Remote) | Aug 2021 - Present

- Develop and maintain full-stack chatbot products across the stack using **Node.js**, **Vue.js**, and **React**, within an Agile delivery team.
- Designed and shipped a standalone AI-powered voice-calling product with **NuxtJS**, integrating the third-party **VAPI** platform.
- Integrated the **WhatsApp Cloud API** to add new messaging channels to chatbot products.
- Partnered directly with clients (Singapore, Malaysia) and cross-cultural teams (Singapore, Indonesia, Vietnam) to turn complex requirements into shipped features.
- Refactored legacy UI and delivered new interfaces, improving maintainability and resolving longstanding component issues.

PROJECTS

Danang Fantasticity Analytics — Marketing Analytics Dashboard

- Built a full-stack internal dashboard unifying **GA4**, **Facebook**, and **TikTok** marketing data into one normalized reporting platform — **React 19/Vite/TanStack/Tailwind** frontend, **NestJS/Drizzle ORM/PostgreSQL** backend.
- Implemented scheduled provider-sync workers (**BullMQ**, **Redis**) and integrated external provider APIs behind a shared analytics contract; deployed as a **Docker Compose** stack (Nginx, API, PostgreSQL, Redis).

Da Nang Fantasticity — Official Tourism Portal

danangfantasticity.com

- Led end-to-end frontend development of Da Nang's official tourism site from scratch with **Next.js**, consuming a **WordPress** headless API with multi-language support (English, Vietnamese, Korean, Chinese) for a global audience.
